Textbook of Tinnitus

1st Edition, 2011, 786 p., 157 illus., 57 in colour, Hardcover
erscheint ca. Februar 2011.

€ 213, 95 Verlagspreis, **€ 149,00 Kongress-Preis**, gültig bis 31.12.2010.

About this book

Groundbreaking, comprehensive, and developed by a panel of leading international experts in the field, Textbook of Tinnitus provides a multidisciplinary overview of the diagnosis and management of this widespread and troubling disorder. Importantly, the book emphasizes that tinnitus is not one disease but a group of rather diverse disorders with different pathophysiology, different causes and, consequently, different treatments.

This comprehensive title is written for clinicians and researchers by clinicians and researchers who are active in the field. It is logically organized in six sections and will be of interest to otolaryngologists, neurologists, psychiatrists, neurosurgeons, primary care clinicians, audiologists and psychologists.

Textbook of Tinnitus describes both the theoretical background of the different forms of tinnitus and it provides detailed knowledge of the state-of-the-art of its treatment. Because of its organization and its extensive subject index, Textbook of Tinnitus can also serve as a reference for clinicians who do not treat tinnitus patients routinely.

Keywords

Auditory nervous system - Auditory system - Cochlear implants - Continuous tinnitus - Hearing - Hearing aids - High frequency - Hyperacusis - Intermittent tinnitus - Low frequency - Microvascular decompression - Neural plasticity - Phonophobia - Plastic changes - Posttraumatic tinnitus - Pulsatile tinnitus - Somatic tinnitus - Tinnitus - Transcranial magnetic stimulation.
